

The newest safety product to come on to the market is the *Hose&CableTidy*, this S'Hook safety system can assist with creating a safe and non hazardous work area by keeping all your cables and hoses off the ground where they would otherwise be causing tripping hazards. Slip and trip accidents can happen at any time and for a number of reasons. You should never accept an untidy work place, this is the main reason for tripping accidents. We looked at why they happen and where they happen, the true cause is always bad housekeeping. The *Hose&CableTidy* can be used to keep unwanted messy hoses and cables off the floor in congested area's thus reducing the tripping hazards. 50% of all trip accidents are caused by bad housekeeping, improving housekeeping would eliminate a large number of accidents. Below are a few examples of good and bad housekeeping, make sure yourselves and your work colleagues go home safely at the end of every day, *Safe Thinking Saves Lives!*

Raised Hoses using the *Hose&CableTidy*

Raised Hoses using the *Hose&CableTidy*

Tidy storage of shutdown hose and cable runs – preventing trip hazards.
 Secure tight fit over scaffold poles and handrails – preventing inadvertent removal or being blown/knocked off.
 Soft rubber coating over metallic core – preventing potential sparks or damage to plant and personnel if dropped.
 Neoprene rubber coating – resistant to ozone and atmospheric ageing, resistant to oil and lubricant contamination, self extinguishing.
 Soft rubber tongue – allowing easy loading/unloading of cables/hoses and securing in place whilst in use.
 Soft rubber tongue – advises user that the component has been overloaded or damaged if it doesn't retain it's inner position when loaded.
 SWL tested to 50KG's – SHOULD NOT BE USED AS LIFTING HOOK

Bad Housekeeping Tripping Hazard in walkway

Bad Housekeeping Tripping Hazard in walkway

Soft rubber coating over a metallic core – preventing potential sparks or damage to plant and personnel if dropped from height.
 The *Hose&CableTidy* is Locked onto any scaffold pole giving stability when in use so you don't have to worry about it falling to the ground.

Don't learn about safety by accident

Tool Safety Lanyard

Our safety tool lanyard is 1m long and made from a tough seat belt webbing material that can be attached to hand tools which prevents them falling to the ground when working at height. A must have on building sites and when working on platforms.
