

Product Specification Sheet • Novus Acid Spot Spray

Novus Acid Spot Spray is a high performance translucent yellow spray that immediately turns purple upon contact with small drops of acid pH 2.6 or lower. This is a water soluble product used for the detection of accidental spills or leaks of acids.

Service

Novus Acid Spot Spray is used whenever an acid spill or leaks is suspected or occurs. It is used to determine the perimeter of the spill or to confirm the isolation, repair, and neutralization of a leak. Use this product before coating a potentially contaminated surface or to ensure clean up has been adequately completed.

Availability

The product is supplied in spray bottles - 0.47 litres.

Application

Novus Acid Spot Spray can be used, but not limited to, in the below applications:

- Truck Tankers & Rail cars
- Laboratory Surfaces
- Pipes & Weep Holes
